We need to establish a train system to New York City and across Westchester connecting to Rockland County! Why does Westchester have a commuter train and we in Rockland have no viable system? We need this in order to ease congestion on our roads, highways, and across the TZ Bridge, and do something about the pollution it's causing. (And have you ever tried commuting to NY City from Rockland County??? It's a horrible experience.) This will be good for the environment and the economy!  
Thank you.
