Subject: School Project

I am a teacher at The Masters School in Dobbs Ferry and one of my 6th grade students would like to do a research paper on the architectural beauty of the Tappan Zee bridge. These days all we are finding is information on renovation etc. but nothing on keeping the structure intact due to its simple beauty and to preserve architectural innovations. Is there someone we can speak to about this aspect of the bridge's future?

Many thanks,

Margaret George
