

TZB-085E

It seems to me like sending out a 91 page document is a way of avoiding getting comments from most people who do not have time to plough through that thing.

10

Right now I personally do not believe that the Tappan Zee Bridge is safe and I am afraid every time I cross it that this is going to be the time that I fall into the river. We've been going round and round on this project ever since I moved to the Tarrytowns in 1986 -- and still we seem no closer to a solution.

I do want to see a train and a pedestrian walkway. I do want minimally intrusive improvements.

10

But most of all I don't want my car to fall into the river as I'm driving across the bridge -- and I really am not convinced that the DOT is committed to making sure that doesn't happen.

I don't feel like I can devote enough time to this right now to read a 91 page document.

Just get on with it already.
