

**TZB-087E**

To all:

The only way you are going to keep New York expanding for the future with it's commerce and economy. Is to build an entire new structure with two levels, with mass transit. Or build another next to the old one, with mass transit capability. Move the traffic on the new one, than rebuild the old and have one bridge for eastbound and the other for westbound. (example: Delaware Memorial Bridge)

10

Sincerely,

Alan Burczyk
