

**TZB-084E**

Option 4A-a new bridge will full east- west commuter rail is the most sensible way to proceed. As with any infrastructure investment, the cost may seem enormous at the onset, but over the long haul it will prove to be the most economical. The cost will only increase with time and investments in the infrastructure made now will provide immediate returns in construction jobs and future returns in the form of making the entire region more attractive to both residents and business.
