

**TZB-167E**

I think the Tappan Zee Bridge should be repaired not replaced which would cause less disruption to Nyack and Tarrytown and an additional dedicated lane for commuter buses and trucks.

The increased deterioration of the bridge is due to the access of trailer trucks from the Jersey portion of 287 therefore there should be raised toll cost based on truck weight. Also truck inspection should be a priority to decrease pollution effects on the nearby towns along the TZ route.
