It is really important to have a Metro North train connection in Rockland that provides a direct route to Grand Central. Having the ability to commute to Manhattan in 45 minutes would have huge benefits for the county. It would definitely make Rockland a more viable place to live since it would have a direct link to the regions largest employment center. Right now, in order to get to NYC via train, it either involves a Secacus/Hoboken transfer in NJ on NJ Transit or a bus ride to the Tarrytown Metro North station. A direct train link via the TZ Bridge is a very important aspect to consider when planning a new or renovated bridge.
