

**TZB-139E**

I didn't like this warren or boone truss bridge when it first opened,or now. I see tunnels the answer,2 for cars,2 for trucks, 2 for trains,and 2 for service.tunnels would not hender current traffic.no painting ,no foul wheather,no jumpers, no crashes over the guard rail.TBMs would be the tool of choice.once the tunnels are finnished,keep going east & west to long island and chicago for bullet grav-rails,then on to L.A. for aquaducts.
