

TZB-093E

Thank you for hearing a comment from me about what should be done with the Tappan Zee Bridge.

My comments will be short and sweet. If you don't build a new bridge with trains going across to Westchester it will be a big mistake. A one-seat ride to Grand Central Station is a must! Orange and Rockland Commuters deserve this. Yes, the option is expensive, but we want the new TZB to keep up with the times and help to ease traffic congestion caused by commuters. Also, I think it would be ideal if truck traffic over the bridge was isolated from car traffic. It can be harrowing crossing that bridge with trucks barreling past you or coming fast up behind you.

Thank you for your attention.
