Subject: my thoughts on the TZ Bridge

Hi,

I have lived in Westchester/Fairfield/Rockland county area all my life. (I am 53.) I hope you include some sort of mass transit in the planning for the new bridge. I would prefer a rail connection from Suffern to Portchester. Having a bus going between Tarrytown to Portchester is not as good an option. Otherwise, I don't have any strong feelings as to what you do with the bridge other than improve/maintain it. Including a means for pedestrians and cyclists is nice too. How that is done is up to you.

Along those lines, I do wonder how people with broken-down cars will fare with new roadway replacements you are installing now. There are no sidewalks on them. There is nowhere for people to get out of the way. What are people supposed to do if they find themselves stuck on the bridge? They are sitting ducks for getting hit.

Thank you.
