

**TZB-040E** Hello members of the Tappan Zee Bridge / I-287 Environmental Review Board,

I would appreciate if you all would consider in your plan a possible pedestrian and bicycle path. It would be nice if the new bridge had a pedestrian and bicycle path just like the George Washington Bridge. I've been a bicyclist all of my life and having the ability to cross the bridge on my bicycle not only would be fun but it is good for the environment. The George Washington Bridge has a pedestrian walkway on the northern side of the bridge and a bicycle path on the southern side of the bridge. A lot of folks use both paths especially in the warmer months. Thank you very much for your time.

Sincerely,

Raymond D. Mahabir
