

TZB-121E

Just wanted to let the Committee know that I support Alternative 4B because I believe we need to create an off-shoot of the Port Jervis Line that crosses over the bridge to connect with the Hudson Line on down to Grand Central and I think a light rail system between Tarrytown and Port Chester can help reduce traffic in Westchester county while also providing better public transportation options for those in the county that don't drive.

If rail is not an option than can be pursued, then the current bridge should be fixed up. There is simply no reason to build a new bridge if rail is not part of the solution.
