Gentlemen

Please build a Tunnel rather than fixing up the Tappan. Bridges are low cost to maintain. Brides last for centuries and now thanks to the Chunnel, distance is not a problem. In additon with a tunnel it will accommodate Car, Trucks, and Heavy Duty Rail Road Traffic. Lastly tunnals do not mare the Scenery.

Thank you for Implementing this Proposal

Gentlemen,

Building a Tunnel will allow for a cross Westchester Rail Road that will connect the Hudson, Harlem and New Haven Lines to this new form of transportation. In addition Millions of Commuters would no longer need to use there cars for transportation to their jobs. This in turn would have a positive role in deminishing our dependence on Foreign Oil.

Very Truly Yours
