

TZB-024E

As residents of the Retreat at Airmont, we must strongly object to the idea of a train station in Airmont.

We are a community of senior citizens - we are personally at the "Eighty Year" mark. We purchased our condo to be near our children, medical services and shopping. We recognized that the noise and pollution of the NYS Thruway was not in our best interest physically, but in weighing the positive elements of such a move for us, we waived the negative. Having a train station with all the associated noise and pollution along with the congestion such a facility would bring is just stress producing and unhealthy.

We hope you will consider our comments in your deliberations. Surely, a less congested area of housing would be more appropriate. We thank you for the opportunity to voice our concerns.
