Subject: new bridge

Attachments:

It is most important that as you plan for future construction that plans include passage for bicycles. Living in Nassau County I am frustrated by the lack of foresight in new projects that never considered the possibility of bicycle travel. Retrofitting will never happen and is costly.

Please if we are to address the energy crisis and our obesity crisis, insure that all have the opportunity for bicycle travel by including a way for us to travel across the Bridge..

Thank you,

Rose Bonanno
